

IN THE SPECIFICATION

Please amend the specification as follows:

Replace the paragraph beginning at page 16, line 3, with the following replacement paragraph:

---Referring to FIG. 16, point 16 continues to step 430 that determines if a positional palette has been selected and, if not, step 432 sets a default positional palette. Step 434 responds to a Yes determination of step 430 or to a completion of step 432 to determines if a character palette has been selected and, if not, step 436 sets a default character palette. ~~If yes, step 434 records the selected character palette.~~ Step 438 responds to a yes determination of step 430 ~~434~~ or to a completion of step 432 ~~436~~ to determine if the ordered sequence is to be continued after printing. If so, step 440 records or sets continue the sequence. Step 442 responds to a ~~Yes~~No determination of step 438 or a completion of step 440 ~~to~~by waiting for actuation of generate labels button 188 (FIG. 8). When generate labels button 188 has been actuated, step 444 forms a labels sequence file. Step 446 waits for actuation of OK button 190 (FIG. 8). When OK button 190 has been actuated, control passes to a point 17 that is continued in FIG. 17.---

Replace the sheet of Drawing that contains Fig. 13 with the attached Replacement Sheet.
